

Dara Ade

Web Developer

dara.ade@example.com | github.com/daraade | Lagos, Nigeria

Summary

Junior web developer focused on building responsive, accessible sites with HTML, CSS and JavaScript. Comfortable turning a design brief into a working, mobile-first interface and deploying it live.

Skills

HTML5 & semantic markup · CSS3 (Flexbox, Grid, responsive design) · JavaScript (DOM, events, Fetch API)
· React fundamentals · Git & GitHub · GitHub Pages / Netlify deployment

Projects

Personal Portfolio Website	Responsive multi-section site with dark/light mode, built from scratch.
Weather Now	City weather lookup using the OpenWeather API, with form validation and error states
Task Board	Vanilla JS kanban-style tracker using localStorage for persistence.

Learning Focus

Currently deepening React fundamentals (components, props, state) and getting comfortable shipping small backend features alongside frontend work.

Note

This is a sample résumé for the portfolio template — replace with your own details, projects and contact information.
